On the other hand, according to the researchers, most patients who did not respond to the first course of therapy stopped taking the medicine because of side effects. The researchers also noted that the patients who did not respond to the first course of therapy had a higher risk of relapse than those who did respond.

For example, the authors of a recent paper<sup>1</sup> note that the negative impact on the economy of the 1997 Asian financial crisis was not necessarily as dire as it may seem, as the authors note that the Asian crisis was not as severe as the 1929-33 crash in the United States. They also note that the Asian crisis was not as severe as the 1929-33 crash in the United States.

The very presence of a significant interaction between the treatment and the type of the intervention (individual or group) was also observed in the regression model for the significantly smaller effect of the intervention on the

These results are in agreement with previous studies, which have indicated that the main responsibility for the heavy burden of the disease is borne by the 10% of the population with the most severe disease. This is consistent with our observation that the greatest vulnerability is still for the poorest 10% of the population.
