

...efficient machine, but carrying the job is much more difficult than it is. The machine's automatic nature becomes the biggest threat to the user's safety. (See page 10)

"This is the biggest safety issue of the machine," says the author. "The machine is so fast, it's easy to get caught in it. The machine is so fast, it's easy to get caught in it. The machine is so fast, it's easy to get caught in it."
